

Day 1

White lines can be on what side(s) of the car?

Yellow lines should only be on what side of the car?

What 3 driving activities are restricted until you turn 18?

What are the restrictions related to passengers that apply;

- During your 1st 6 months of driving
- After you have had your license for 6 months

How much does the risk of a teen driver dying in a fatal crash increase with

- 1 passengers
- 2 passengers
- 3+ passengers

If you are driving between 1am and 5am, your copilot must be at least _____ years old

What are the restrictions related to electronic devices that apply until you are 18?

When are you allowed to use your phone while driving?

How many bad choices does it take to cause a car crash?

What are 8 common reasons young drivers are more likely be in a fatal crash?

What are the 3 parts of the Highway Transportation System (HTS)?

Why is it important for the driver to conduct a pre-drive inspection of their car?

What are you required to have with you when driving?

How can you tell if your tires are unsafe because of worn out tread?

What damage to the sidewall of the tire would make it unsafe to drive on?

A tire might be _____ under inflated before the low tire pressure light comes on.

What is the best way to tell if a tire has the proper amount of air pressure?

What are some questions to consider related to:

- Your mood/mental state
- Your route, road and weather conditions

What is the benefit of adjusting your mirrors wide enough that we cannot see any of our car in the mirror?

What must you do to see what threats might be hidden by the A pillars or rearview mirror?

For front seat passengers, how much do seat belts reduce the risk of

- Serious injury
- Death

Day 2

Where should you place your thumbs on the steering wheel while driving?

Which hand position and steering technic will reduce your risk of airbag injury the most and allow you excellent control?

What are the benefits of shuffle steering?

When would you use idle speed or ½ idle speed braking?

What are the benefits of using gradual braking to slow down or stop?

What is the difference between aggressive and panic braking?

What braking technique offers the shortest stopping distance on icy or slick roads?

If your car is in an understeer skid, which tires are skidding?

If your is in an oversteer skid, which tires are skidding?

What are the typical causes of an understeer skid?

What role does traction play in your ability to control your car?

What is the contact patch?

What portion of the contact patch is impacted the most as tire pressure drops?

What are the common factors that will influence how much traction is available?

What determines if you have the traction you need to maintain control of your car?

When driving, what does traction allow you to do?

What impact will your choices have on traction?

What happens when your choice of acceleration, speed, braking or steering demands more traction than your tires can provide?

What is the most common fatal single car crash?

What are the two most common factors that contribute to a run off the road crash?

Where is the car when it is in Lane Position:

- 1
- 2
- 3
- 4
- 5

What lane positions will you use to manage threats on the

- Right side of your car?
- left side of your car?

What lane position should you drive in when there are no threats to manage?

What is the 30-40-50 rule?

Why do crashes happen so often at intersections?

What is the Master Rule of Yielding?

How will the Master Rule of Yield affect your decisions when approaching an intersection?

What are the 4 rules of yielding you should use to interact with other drivers at an uncontrolled intersection?

What is the rule of yielding when backing up?
How might this impact your efforts to Parallel Park?

What are the rules of yield at a 4 way stop?

What rules of yielding should you use if you stop at the same time as another driver?

Day 3

What side of your car should yellow lines be?

If you are driving on a one way street, what color will the lines be?

When MUST a driver use the center turn lane?

When can a driver use the center turn lane?

How should you respond when an emergency vehicle is approaching?

When stopped at an intersection, how should you respond to an approaching emergency vehicle?

What 4 types of vehicles are covered by the Move Over Law?

What is the safety zone created by the Move Over Law?

How should you respond when entering this safety zone?

When is a driver required to stop for a school bus that is stopped to load or unload students?

What is a LOS Threat?

What are some examples of LOS Threats?

What is a POT Threat?

What are some examples of POT Threats?

What 4 tools do you have to manage threats?

How do you use lane position to create space?

What should you do when you have threats on both sides?

In most cases, how would you create time?

In most cases, what does it mean if your only choice to manage a threat is to accelerate hard?

What 2 factors must you consider when evaluating the significance of a threat?

Along with the significance of a threat, what else must you take into consideration?

How do you manage multiple threats?

What are the two basic qualities we evaluate when managing multiple threats?

What 3 goals are we trying to achieve when managing multiple threats?

What are the 6 search zones and what do they tell us?

What are the 3 search ranges and what do they tell us?

We want to find a threat when it is in what search range?

How will we manage threats once they are within 6-15 seconds away?

What is the maximum number of threats we should have in our Danger Range?

What happens to the number and quality of your options as the number of threats in your 4-6 second danger range increases?

You should limit the number of threats in your danger zone to _____.

What is the maximum number of threats you should allow in your danger zone?

Where is the most common place for a crash to occur?

What are the two basic types of intersections?

Entering and exiting the roundabout is similar to what other common intersection?

The exit of a roundabout is an uncontrolled intersection, which of the 4 rules of yielding will drivers use to avoid a crash?

Why is it important to signal your intent as you approach the exit of a roundabout?
